FREQUENTLY ASKED QUESTIONS

Electrical Test And Tag Melbourne

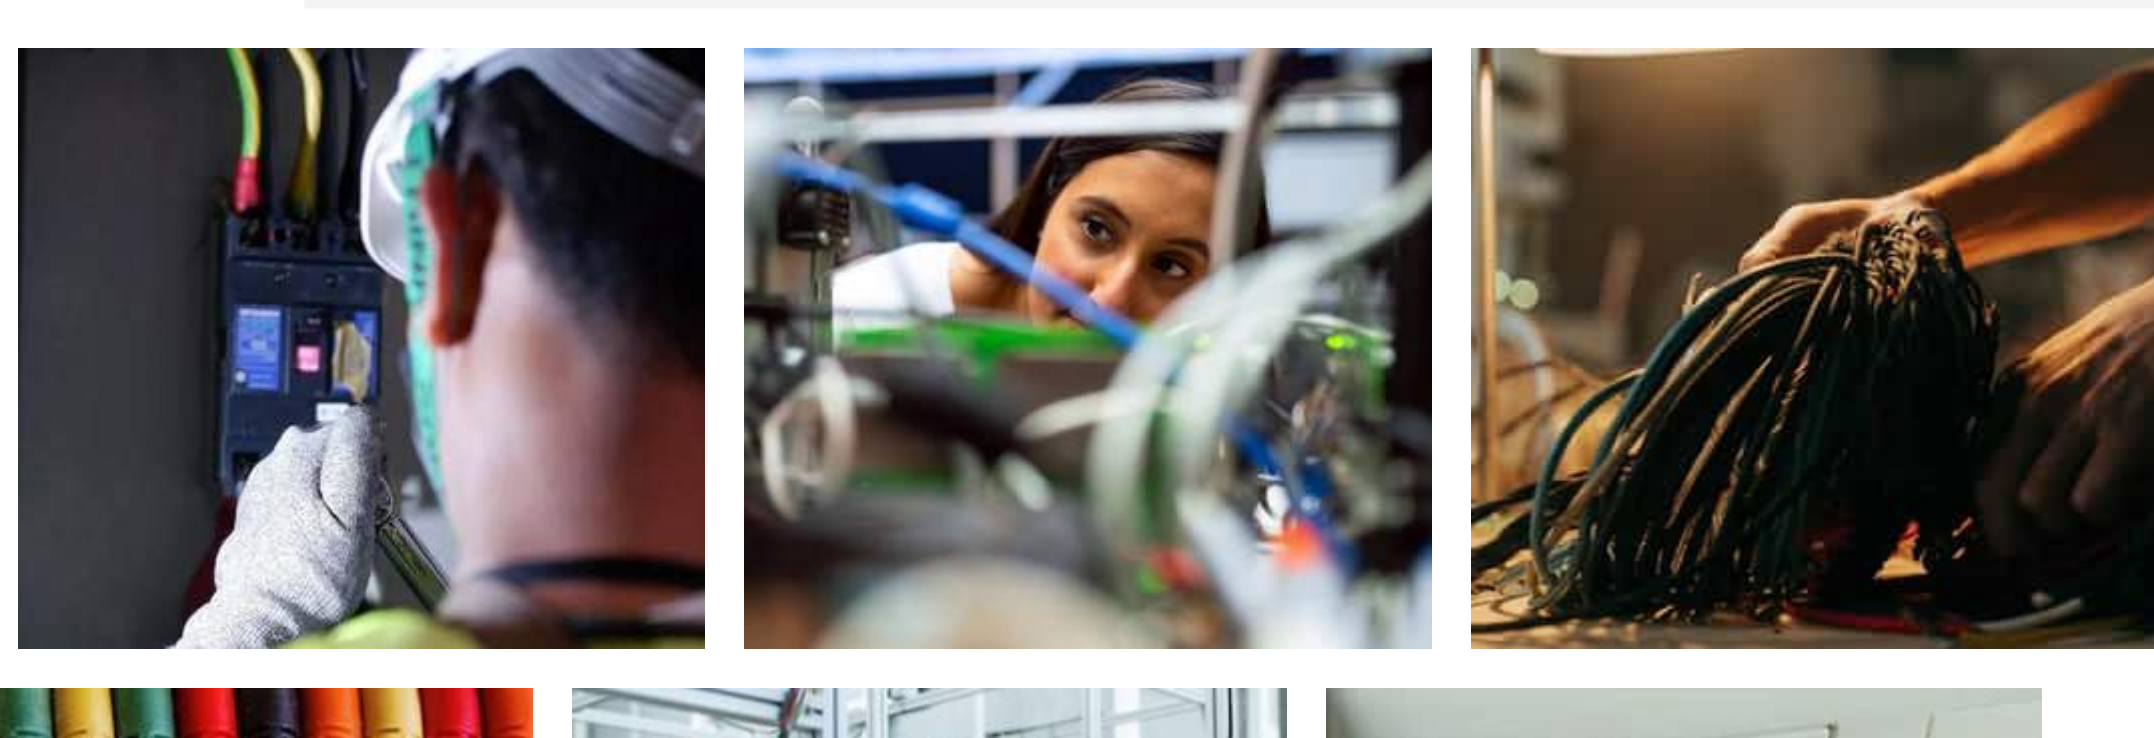

01. Is it necessary to test and tag my appliances?
According to the Occupational Health and Safety Act 2000, employers are responsible for providing a safe work environment for their employees. This includes minimising the risk of electric shock from portable electrical equipment and appliances. A workplace risk management system should include electrical testing and tagging in order to prevent the injury or death of workers. If inadequate safety results in an injury or death, employers and all levels of management face significant penalties.
02. Should second-hand electrical equipment be tested?
03. In my workplace, what items should be tested?
04. What does appliance testing and tagging entail?
05. Should double-insulated appliances be inspected?
06. Do new items need to be tested?
07. What is the best way to test my portable appliances? Can I use a multimeter?
08. What should I look for when hiring a professional test and tag technician?
09. Do I need to test and tag certain areas of my workplace in order to remain OHS/WHM compliant?
10. Can you tell me what information should be included in my test and tag records?
What is Test and Tag Services?
